

♻️ Recycling ♻️

Στο πλαίσιο του μαθήματος των Αγγλικών οι μαθητές της Ε' τάξης έδειξαν μεγάλο ενδιαφέρον στην 5^η ενότητα του σχολικού βιβλίου για το θέμα της ανακύκλωσης. Συνεργάστηκαν με μεγάλη χαρά, έφτιαξαν κολάζ, ζωγράρισαν και δημιούργησαν ο καθένας με το δικό του μοναδικό τρόπο αφίσες που απεικονίζουν τις ιδέες τους για την προστασία του περιβάλλοντος.

Συγχαρητήρια για τον ενθουσιασμό, τη διάθεση για συνεργασία, την πρωτοτυπία αλλά και το κέφι που επέδειξαν.

Υπεύθυνη καθηγήτρια ΠΕ06,

Ευανθία Παππαδιονυσίου

PROTECT OUR PLANET! RECYCLE!

GLASS

PLASTIC

Recycling is a simple and useful action that we can all do to protect the earth and live better. Let's recycle the glass, paper, metal and plastic that we use and not throw them in the bin. Let's put the recyclable materials in the blue bin or the brown one, so that they can become new products. Let's contribute to recycling and make the earth greener and more beautiful.

An exhibition with a message

Do you want to meet a shark? How about a very big jellyfish? Well, this week you can. At the 'Washed Ashore' exhibition, there are lots of huge sea creatures. And guess what - they're all rubbish! Well, actually, they used to be rubbish - plastic rubbish. All the pieces of plastic in these sculptures came from the beach: plastic bottles, toys, and plastic bags, of course. People collect the rubbish and take it to the 'Washed Ashore' project.

The artist, Angela Hasettine Pozzi, designs and builds sea creatures from this rubbish. There is a big red octopus, a seahorse, a sea turtle and even the tail of a whale. There are hundreds of bits of plastic in each sculpture. People visit the exhibition and they think about the environment. One visitor said, 'I didn't use to think about the plastic in the oceans, but now I understand. The art here shows many different sea creatures. These creatures used to live in a clean and beautiful sea, but now they swim in a sea full of rubbish!'

PAPER

ALUMINIUM

Rafaelia and Chrysoala

I love my planet

Monday:

We are going to recycle paper, plastic, metal, glass and aluminium.

Tuesday:

We are going to clean the beach.

Wednesday:

We are going to a demonstration for the environment.

Thursday:

We are going to plant some trees in the park.

Friday:

We are going to make an informative video about saving energy and water.

Saturday:

We are going to make a large donation to an environmental organization.

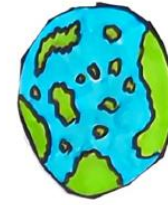

Sunday:

We are going to try to reduce the amount of plastic and non-recyclable materials we use.

I love the environment

MONDAY : We are going to pick up trash.

TUESDAY : We are going to plant trees in the park.

WEDNESDAY : We will recycle plastic, aluminum, paper, metal and glass.

THURSDAY : We will save water and electricity.

FRIDAY : We will give money to an environmental organization.

SATURDAY : We will hold a demonstration for the environment.

SUNDAY : We will create gardens on the roofs.

ΑΧΙΡΑ ΕΛΑΣ, ΑΥΤΩΝΗΣ, ΑΥΧΕΡΟΣ, ΑΥΤΩΝΗΣ, ΑΥΧΕΡΟΣ, ΑΥΤΩΝΗΣ, ΑΥΧΕΡΟΣ, ΑΥΤΩΝΗΣ

MONDAY: we will plant trees
TUESDAY: we will clean the sea
WEDNESDAY: we will recycle the trash that we picked up yesterday
THURSDAY: we're going to road.
FRIDAY: we are going to plant trees again. ♡

Environment

Monday We're going to plant trees and flowers.
Tuesday We're going to recycle paper, plastic, aluminium and more.
Wednesday we're going to put signs everywhere.
Thursday We're going to walk around by bike.
Friday We're going to water the plants.
Saturday We're going to clean beaches.
Sunday We're going to be more careful when we light fire.

o Problems that can be caused if we don't recycle

1) The amount of forests will decrease
By recycling a ton of paper we
save 17 trees.

2) Plastic pollutes the environment. One bottle
takes 450 years to decompose.

3) The planet will be filled with garbage
disposal areas.

Recycling helps in protecting the environment and our future!
